

Dual Booting Exercises

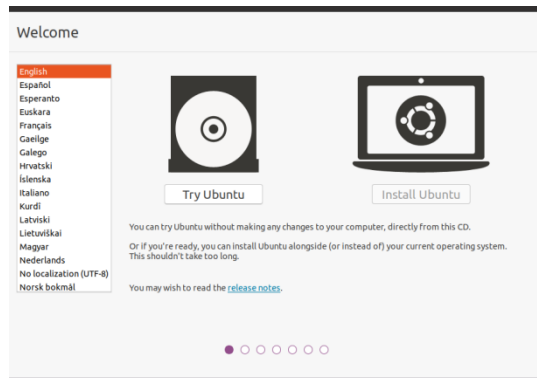

3. If you lose the bootloader in exercise 2, use the tool “Boot-Repair”, which will let you solve the issue. If necessary, use the following the instructions in the URL:

VirtualBox Graphical User Interface Version 6.1.14 r140239 (Qt5.6.2)
en_windows_10_professional_x64_dvd
ubuntu-20.04.1-desktop-amd64
boot-repair-disk-64bit

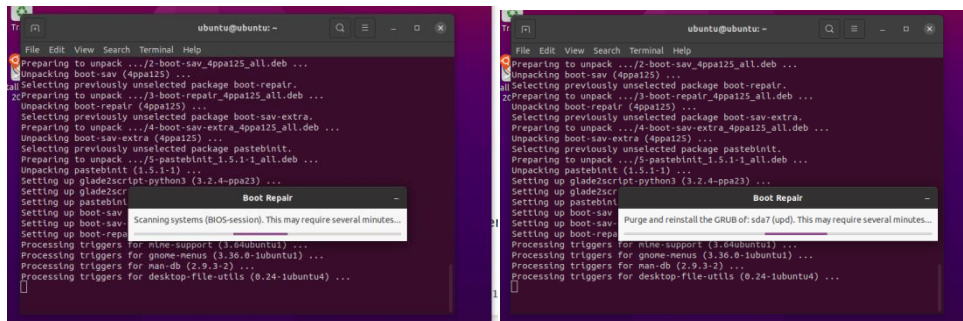

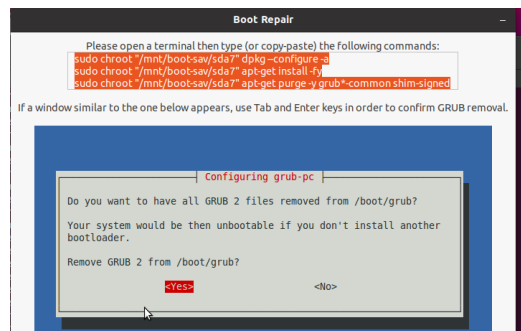

Trying second option

```
sudo add-apt-repository ppa:yannubuntu/boot-repair
sudo apt-get update
sudo apt-get install -y boot-repair && boot-repair
```

It does not work
